

N¹-Methyl-dG CEP Product No. BA 0209

Product Information

C₄₄H₅₅N₈O₇P
Mol. Wt.: 838.93

Coupling, cleavage, and deprotection: N1-Methyl-dG CEP couples with greater than 95% efficiency (typically >97%) using the standard protocols recommended for popular synthesizers. Cleavage and deprotection may be accomplished using standard techniques e.g., concentrated ammonium hydroxide at 55 °C for 18 h.
