

5'-Deoxythymidine CEP

Product No. BA 0405

Product Information

C₁₉H₃₁N₄O₅P
Mol. Wt.: 426.45

Use: Dissolve the phosphoramidite in acetonitrile at concentrations recommended by the synthesizer manufacturer. Coupling should be carried out using standard instrument protocols. Cleavage from the solid support can be carried out under standard conditions, and standard deprotection conditions may be employed.
