

*N*¹-Methylpseudouridine CEP

Product No. BA 0412

Product Information

C₄₆H₆₃N₄O₉PSi
Mol. Wt.: 875.09

Use: Dissolve the phosphoramidite in acetonitrile at concentrations recommended by the synthesizer manufacturer. Coupling should be carried out using standard instrument RNA protocols with 12 minute coupling. The best results are obtained for cleavage and deprotection when done with AMA with deprotection at 65°C for 10 min.
